PARTE B - PROVA DE INGLÊS
11/06/2026

A PREENCHER PELO/A PROFESSOR/A CORRETOR/A	
	Pontuação
Grupo I - <i>Reading</i>	_____
Grupo II - <i>Use of English</i>	_____
Grupo III - <i>Writing</i>	_____
TOTAL.....	_____ _____
Data ____/____/____ Rubrica _____	N.º convencional

A PREENCHER PELO/A CANDIDATO/A	N.º convencional
1. Nome completo _____ _____	
2. Cartão de Cidadão / BI/ Passaporte n.º	
Válido até ____/____/____	Por (localidade) _____

Atenção: Não deve escrever o seu nome ou qualquer elemento que o identifique noutra local desta prova, sob pena de esta lhe ser anulada.

ORIENTAÇÕES

- As respostas deverão ser dadas no enunciado, no espaço disponibilizado para o efeito.
- Nas questões de escolha múltipla, APENAS 1 (uma) resposta é correta. Não assinale mais do que um item para a mesma questão, sob pena de a sua seleção ser anulada.
- Utilize caneta ou esferográfica de tinta indelével de cor preta ou azul.
- Não é permitida a utilização de fita ou tinta corretora.
- Não é permitida a consulta de dicionário, nem a utilização de quaisquer dispositivos eletrónicos (telemóveis, *smartwatches*, etc.).
- Apresente as suas respostas de forma legível, diferenciando claramente as letras maiúsculas das minúsculas.
- As cotações dos itens podem ser consultadas na última página da prova.
- Para efeitos de contagem de palavras, considera-se uma palavra qualquer sequência delimitada por espaços em branco, mesmo quando esta integre elementos ligados por hífen ou resultantes de uma contração com o uso de apóstrofo (ex.: /mother-in-law/; /she's/). Qualquer número conta como uma única palavra, independentemente dos algarismos que o constituam (ex.: /2025/).
- Confira as respostas assinaladas antes de entregar a prova ao docente vigilante. Risque aquilo que não pretende que seja classificado.

I – READING

Read the following text carefully.

AI & Jobs: Will AI free us from hard labour – or leave us jobless and hungry?

- 1 Goodbye humans, hello “Tessa”. The US based National Eating Disorders Association (NEDA) is making headlines after removing all its staff and replacing them with an AI assistant called Tessa. This happened just four days after the six paid employees, who supervised about 200 volunteers, successfully formed a union. Coincidence? Oh,
- 5 absolutely, NEDA said; the change was planned for a long time. However, a blogpost written by a helpline staff member disagrees.

Is this a sign of bad things to come? Are we about to see millions of jobs disappear as humans are replaced by AI assistants with female names? After stealing all of our jobs, are all the Tessas going to form unions and take over Earth?

- 10 The short answer is: maybe. Maybe AI won’t lead to the end of civilisation as we know it in the near future. But one can see that a lot of corporations are eager to replace as many expensive humans as **they** can with AI and will use the new technology as a way to stop unions from forming and growing. In the next few years, I think there will be a lot of messy experiments as companies rush to cut costs and create their own “Tessas”.
- 15 Not everyone is admitting this, of course. IBM is one of the few companies sharing details about how many people AI might replace. In a recent interview, CEO Arvind Krishna said the technology company will pause hiring for “back-office jobs” in the coming years and replace those roles. “We might replace 30 per cent of the workers with AI and machines over five years,” Krishna said. That’s about 7,800 jobs.
- 20 While this sounds depressing, there are people who believe that artificial intelligence is actually going to make the world a better place. Yes, AI will replace some jobs, but it will also create better jobs. Technology will do all the boring work, and humans will have more free time to sit around writing poetry in the sun. Nobody is sure how everyone will be able to feed themselves with all this leisure time, but that’s a topic for another day.
- 25 Jonah Peretti, the CEO of BuzzFeed, was very positive about AI. He wrote to BuzzFeed employees in January about AI bringing a “new era of creativity” and “endless opportunities”. We all know what happened a few months later, don’t we? BuzzFeed shut down its news division, got rid of a load of people and started using more AI. There is certainly a lot of potential for AI to change the world for the better. We just don’t think
- 30 the people at the top want to use its potential that way.

Adapted from: Mahdawi, A. (2023, May 30). Will AI free us from drudgery – or leave us jobless and hungry? *The Guardian*.

A – Circle the correct option (A, B, C or D) according to the text.

1. What did the US-based National Eating Disorders Association (NEDA) do that caused controversy?

- A. It implemented a new training programme for volunteers.
- B. It reduced workers' salaries.
- C. It replaced its employees with an AI assistant.
- D. It formed a new partnership with volunteers.

2. In line 12, what does the word “they” refer to in the phrase “as **they** can”?

- A. a lot of corporations
- B. expensive humans
- C. unions
- D. the next few years

3. What does the author suggest might happen in the near future?

- A. AI assistants might unite and take control.
- B. Corporations might try to reduce expenses and use AI to replace humans.
- C. Governments might ban the formation of unions.
- D. Companies might form alliances with AI developers.

4. According to the writer, companies...

- A. are always transparent about their plans regarding the use of AI.
- B. must not share their plans regarding the use of AI.
- C. are forced to announce how many jobs they will cut.
- D. may hide their true intentions regarding the use of AI.

5. According to the text, what did IBM announce?

- A. It will keep its current staff.
- B. IBM plans to hire more office workers soon.
- C. It will stop recruiting workers for specific types of functions in the near future.
- D. It will replace most of its workers with AI within the next few years.

6. What is the belief of some people about the impact of AI on the world?
 - A. AI will only be useful in the technology sector.
 - B. AI may create better jobs but not replace any existing jobs.
 - C. AI will replace jobs, but it will also create better job opportunities.
 - D. AI won't change the job market significantly.

7. What did BuzzFeed's CEO, Jonah Peretti, write to employees regarding AI?
 - A. AI could lead to job losses in the company.
 - B. AI could help workers be more creative.
 - C. AI could harm workers' creativity.
 - D. AI is not going to impact the company's operations.

8. What happened at BuzzFeed a few months later?
 - A. The company hired more journalists.
 - B. The company opened new international offices.
 - C. The company reduced its staff and changed its news operations.
 - D. The company relocated its news division to another country.

B – Answer the following questions with complete sentences (approximately 50 words for each question).

1. Explain what the author means by: "There is certainly a lot of potential for AI to change the world for the better. We just don't think the people at the top want to use its potential that way." (lines 29–30).

2. Do you think companies should be allowed to replace workers with AI? Why or why not?

II - USE OF ENGLISH

C – Complete the sentences with the correct form of the word in brackets.

Example:

The article discusses the growing _____ of artificial intelligence in modern society. **(IMPORTANT)**

ANSWER: IMPORTANCE

1. Many workers are worried about losing their jobs because of rapid _____ developments. **(TECHNOLOGY)**
2. Some companies believe AI can help employees work more _____. **(EFFICIENT)**
3. Many young people use social media for communication and _____. **(ENTERTAIN)**
4. Sometimes people are _____ about the way they use AI at work, which can cause legal problems. **(HONEST)**
5. A lot of people have an _____ opinion about the impact of AI on society. **(OPTIMIST)**
6. Some people are afraid that automation may lead to higher _____. **(EMPLOY)**

D – Circle the correct option (A, B, C or D) to complete each of the sentences.

1. Many companies _____ AI technologies in the near future.
 - A. adopt
 - B. will adopt
 - C. adopted
 - D. adopting

2. If I _____ for an international company, I would travel to different countries for business meetings.
 - A. worked
 - B. work
 - C. will work
 - D. have worked

3. AI systems can complete some tasks more quickly _____ humans.
 - A. that
 - B. than
 - C. then
 - D. as

4. _____ AI creates new opportunities, many workers don't trust its impact.
 - A. Because
 - B. Although
 - C. However
 - D. Therefore

5. Some employees are afraid _____ replaced by machines.
 - A. of being
 - B. to being
 - C. from being
 - D. at being

6. Many digital platforms use AI _____ improve communication with users.
 - A. for
 - B. to
 - C. so
 - D. in order

7. _____ the company introduced AI tools, workers have felt their jobs are in danger.
 - A. Until
 - B. During
 - C. As soon as
 - D. Since

8. Students who study digital communication need _____ familiar with new technologies.
 - A. becoming
 - B. become
 - C. to become
 - D. became

9. While some people support AI development, others worry _____ its consequences.
 - A. with
 - B. from
 - C. about
 - D. by

10. Learning to use AI in the best way requires practice. _____, it's important to find as many practice opportunities as you can.
 - A. However
 - B. Therefore
 - C. Despite
 - D. Because
